The scope of accreditation is flexible as specified in this decision. The accredited body must always retain a current list of the scope for which it is accredited.

Type of flexible scope

1: - Introduce new version of requirements specification

2: - Introduce new version of requirement specification - Introduce new version of certification scheme (Can not include changed requirements directed at the certification body and/or major changes regarding conformity assessment functions or activities, according to ISO/IEC 17067:2013)

3: - Introduce new version of requirements specification - Introduce new version of certification scheme (Can not include changed requirements directed at the certification body and/or major changes regarding conformity assessment functions or activities, according to ISO/IEC 17067:2013) - Introduce new product/process in existing cluster
